About me

About me
My name is Andrey, I was born in 2005 in Ukraine, I graduated from high school in 11th grade and went to university in Kiev. I started my way to programming in the 5th grade, when I was playing servers in the popular game Minecraft and I was very curious to know how it all worked under the hood. I spend all my free time at my laptop because my hobby is the same as my main occupation - programming. I chose backend development because I am interested in knowing how the product works "behind the scenes", in a place where the user sees nothing and does not know how the information is processed, how it is stored, etc.

Main specializations

Experience

Experience (1/2)

Full Stack Developer

ManageGift
IT- Information technology

December 2020 - November 2021
Dubai, United Arab Emirates

My duties
Developing and maintaining a website and partially a Discord bot

- PHP
- JavaScript
- HTML&CSS
- OpenServer
- English (US)

Observed projects

LOGO

DUTCalendarTracker

DUTCalendarTracker can provide easy access to classes from the university website. Get notifications about tomorrow's classes, timetable changes, etc.

- CapRover
- Docker
- TypeScript
- grammY
- Prisma
- BullMQ
- Redis
- NestJS
- ReDoc
- JSDom
- PostgreSQL

LOGO

PoruchBot

PoruchBot was developed especially for a volunteer organization. This bot performs a key function in the branch of getting help for people who have had to change their place of residence because of the war. This bot asks for basic information about the person, validates the data, searches the databases, and prevents possible cheating of the organization from re-registering. This is a very high-load bot.

- TypeScript
- CapRover
- Docker
- grammY
- Prisma
- BullMQ
- Redis
- PostgreSQL

LOGO

SimonBot

A discord bot that can track user orders and show some additional info about orders. Management of Discord servers, notification of new videos on YouTube channels, a tier system based on messages and user activity, fun commands, full moderation suite, real-time table with user data, position rentals, and more.

- discord.js
- Prisma
- Canvacord
- JSDom
- TypeScript
- PostgreSQL

LOGO

MyStorage

Handy application for hosting and easy to manage your files in S3 buckets. You can upload, delete or search your files just by using the interface application.

- Docker
- CapRover
- Fastify
- Prisma
- TypeScript
- Svelte
- TailwindCSS
- Vite
- daisyUI
- PostgreSQL
- AWS S3

LOGO

Pauperial

Simple tool for making short links and QR-code for your long links. Reduce your links, get link click-through statistics, and more.

- Docker
- CapRover
- Express.js
- TypeScript
- PostgreSQL
- TypeORM
- Svelte
- TailwindCSS
- Vite
- daisyUI

LOGO

LWJENNI

Discord bot developed especially for my brother. The bot manages user roles, which users can select by clicking on a specific button.

- Docker
- CapRover
- discord.js
- Prisma
- TypeScript
- PostgreSQL

LOGO

UserBot

A script to simplify some activities from my telegram account. This is my first work with the User API, the script can listen to messages and reply to them under certain conditions.

Docker

CapRover

TypeScript

LOGO

lwjerri.js.org

Project with my old website, hosted by GitHub Pages. This is my first personal front-end project with Node.js as a base and other tools for front-end development.

TravisCI

GitHub Pages

Svelte

Vite

TailwindCSS

JavaScript

HTML&CSS

LOGO

lwjerri.dev

The source code of my personal website made based on Vite + SvelteKit using TailwindCSS + daisyUI.

Vercel

SvelteKit

TailwindCSS

TypeScript

Vite

daisyUI

LOGO

GTAV

A modern platform for GTA V mod creators to upload and share mods. Users can create accounts, upload mods, like mods, add to favorites, share, and comment.

Docker

CapRover

TypeScript

discord.js

Express.js

PostgreSQL

TypeORM

Svelte

TailwindCSS

Vite

daisyUI

AWS S3

LOGO

Riddea

Telegram bot for viewing random anime images and uploading your custom images. Users could both upload their own images and browse other images using different APIs.

Docker

CapRover

Husky

TypeScript

NestJS

Fastify

PostgreSQL

TypeORM

AWS S3

telegraf.js

LOGO

Riddea Web

The web part for the bot. You could browse your own or someone else's collection of images on the website.

Nginx

Svelte

TypeScript

Vite

Docker

CapRover

LOGO

Lequille

LOGO

AllStarz

Private Discord bot developed especially for streamer AllStarz. This bot has one important role - it links the discord and telegram chats and sends messages, photos, videos, etc. between the chats. There is also a private Discord bot for the closed NFT trading community. This bot manages the tier system, creating voice channels and the monthly user subscription for NFT creators.

Docker

CapRover

discord.js

PostgreSQL

TypeORM

grammy

TypeScript

Stripe

LOGO

Modestai

LOGO

LoonaSoftBot

Private Discord bot developed especially for streamer Modestai. Chat moderation, stream start notification, ranking system, and much more. The project is not currently in development. Special Telegram bot developer for the LoonaSoft channel. This bot acts as a subscription manager and processes requests to join the channel.

Docker

CapRover

discord.js

TypeScript

TypeORM

Docker

CapRover

Stripe

grammy

Prisma

TypeScript

LOGO

ManageGift Web

Design for the website of one Discord bot. The site contained information about the bot, the staff, a list of all the teams, and some information that was loaded as the page progressed.

PHP

JavaScript

OpenServer

HTML&CSS

LOGO

VilStats

Windows application for managing information about human stats. This application allows you to do full CRUD with human data through a simple UI interface.

JavaScript

PHP

OpenServer

HTML&CSS

LOGO

Openner

Private Discord bot developed especially for YouTube & Twitch streamer Oxyas. This bot maintains statistics on messages sent, moderates chat, and notifies about the beginning of the stream on Twitch and new videos on YouTube. Performs small things like assigning roles, creating private voice channels, etc. It's also one of my first bots, so I was just starting to learn programming at the time.

discord.js

LOGO

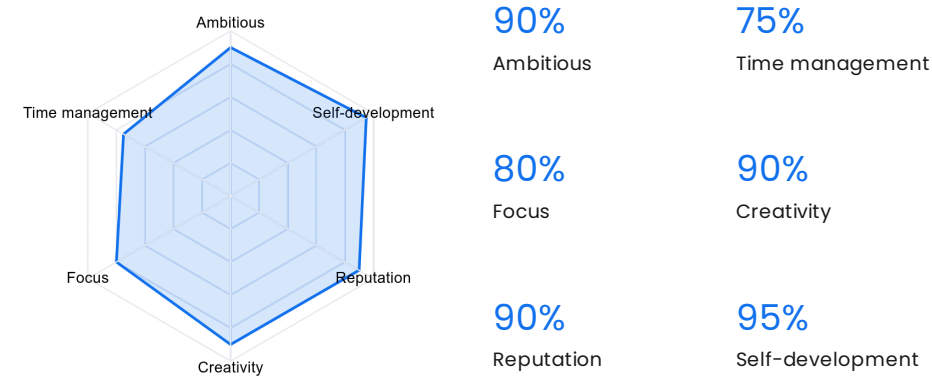

telegraf-rate-limiter

An easy member message rate limiter for the telegraf.js framework.

npmjs

telegraf.js
